DATE MAILED: 01/07/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No. **10/005,778**Applicant(s) **LI ET AL.**Examiner **Erin M. File**Art Unit **2634**

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11/8/2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1, 7 and 11 is/are rejected.
- 7) ☒ Claim(s) 2-6, 8-10, 12-19 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 7, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Belveze in view of Napolitano.

**Claim 1**, Belveze discloses a filter bank (fig. 5, 71, col. 13, line 45) for processing a baseband signal (20) of a received continuous phase modulated (CPM) signal with a modulation index (col. 13, line 5). The filter bank outputs to a Soft Output Viterbi Algorithm (SOVA, 86) delivering the estimations of the input bits,  $D_m$ , of the external encoder (82), and the corresponding likelihoods  $\lambda_m$  (col. 14, lines 54-57). The symbols  $D_m$  belong to a symbol sequence of a defined alphabet (col. 1 lines 10-14, col. 4, lines 21-22). The plurality of signals input to matched filters (71) are preconditioned by the Channel Estimation and Synchronization Unit (69) that creates an impulse response based on the complex valued input signal (col. 13, lines 35-39). Belveze fails to disclose an integer modulation index, however Napolitano teaches a Continuous Phase Modulation method that uses integer modulation index (abstract). Napolitano discloses that the use of integer modulation index values for CPM signals allow for more general

Art Unit: 2634

representations of Pulse Amplitude Modulation (PAM) signals. Therefore it would be obvious to one skilled in the art at the time of invention to incorporate Napolitano's teachings into Belveze's apparatus.

**Claim 7**, inherits the limitations of Claim 1. Belveze further discloses that the filter bank is a matched filter bank (fig. 5, 71, col. 13, line 45).

**Claim 11**, Belveze discloses a receiver (fig 5, col. 13, line 17) and filter bank (fig. 5, 71, col. 13, line 45) for processing a baseband signal (20) of a received continuous phase modulated (CPM) signal with a modulation index (col. 13, line 5). The filter bank outputs to a Soft Output Viterbi Algorithm (SOVA, 86) delivering the estimations of the input bits,  $D_m$ , of the external encoder (82), and the corresponding likelihoods  $\lambda_m$  (col. 14, lines 54-57). The symbols  $D_m$  belong to a symbol sequence of a defined alphabet (col. 1 lines 10-14, col. 4, lines 21-22). The plurality of signals input to matched filters (71) are preconditioned by the Channel Estimation and Synchronization Unit (69) that creates an impulse response based on the complex valued input signal (col. 13, lines 35-39). Belveze fails to disclose an integer modulation index, however Napolitano teaches a Continuous Phase Modulation method that uses integer modulation index (abstract). Napolitano discloses that the use of integer modulation index values for CPM signals allow for more general representations of Pulse Amplitude Modulation (PAM) signals. Therefore it would be obvious to one skilled in the art at the time of invention to incorporate Napolitano's teachings into Belveze's apparatus.

***Claim Objections***

3. Claims 2, 8-10, 17-19 are objected to because of the following informalities: the value of index value L is not defined.

Appropriate correction is required.

4. Claims 3-6, 12-16 are objected to as dependent upon a rejected claim, but would be allowable if rewritten in independent form.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erin M. File whose telephone number is (571)272-6040. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on (571)272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
